Life after PhD

Career path from PhD study to the management position at the pharma company

20/11/2019

With **Dr. Vilém Guryča**

room 145, building A35
University Campus Bohunice
10.45–12.30

What to expect:

- Learn about an adventurous journey from laboratory to the private company
- Talk about crossroads and milestones that you can meet on the career path from PhD study to the management in the pharma industry

Vilém Guryča

Graduated from analytical and polymer chemistry at the Charles University, Institute of Macromolecular Chemistry, Prague. After a couple of scientific stints at various academic institutions worldwide, worked as an analyst for pipeline and portfolio planning at Roche Pharma, Switzerland. Among other experience, Vilém worked on optimisation of R&D late-stage investment decision-making up to CHF 1B mainly in the neuroscience sector and coordination of multi-departmental projects in areas of late and early-stage investments, strategy, finance and business partnering.

Life after PhD is a series of meetings with successful scientists from academia, business and public sector. The visitors share their valuable first-hand experience with specific scientific career track and tackling the challenges along the way. You can expect a lot of inspiration, open discussion and material for planning your future in science.
