

**Faculty/institute topic in the field of "Water and Biodiversity"**

**Faculty of Science:**

**Finalize and expand the geopark on the Kotlářská campus, which is near the Botanical Garden of the Faculty of Science, Masaryk University**

The project proposal focuses on the development and finalization of the educational geopark on the premises of the Faculty of Science at Masaryk University on Kotlářská Street. The main objective is to strengthen its role as a modern educational and popularization space that connects the topics of water, the rock environment, and landscape diversity.
